New Language Features

Added in Java 15 JEP 378

```
String simpleJSONMessage = "{\n" + //
    "\t\"firstName\": \"Billy\",\n" + //
    "\t\"lastName\": \"Korando\",\n" + //
    "\t\"jobTitle\": \"Java Developer Advocate\",\n" + //
    "\t\"twitterHandle\": \"@BillyKorando\"\n" + //
    "}";
```

```
String simpleJSONMessage = """
                 "firstName": "Billy",
                 "lastName": "Korando",
                 "jobTitle": "Java Developer Advocate",
                 "twitterHandle": "@BillyKorando"
         11 11 11 ...
```

```
String simpleJSONMessage = """
                "firstName": "%s",
                "lastName": "%s",
                "jobTitle": "%s",
                "twitterHandle": "%s"
        H H H .
System.out.println(simpleJSONMessage.
        formatted("Billy",
                "Korando",
                "Java Developer Advocate",
                "@BillyKorando"));
```

```
String aReallyLongLine = """
    Lorem ipsum dolor sit amet, consectetur adipiscing elit, \
    sed do eiusmod tempor incididunt ut labore et dolore \
    magna aliqua. \
    """;

System.out.println(aReallyLongLine);
```

Added in Java 14 JEP 361

```
switch (args[0]) {
case "1" -> System.out.println("Sunday");
case "2" -> System.out.println("Monday");
case "3" -> System.out.println("Tuesday");
case "4" -> System.out.println("Wednesday");
case "5" -> System.out.println("Thursday");
case "6" -> System.out.println("Friday");
case "7" -> System.out.println("Saturday");
default -> System.out.println("Invalid selection, valid choices 1-7");
```

```
String result = switch (args[0]) {
case "1" -> "Sunday";
case "2" -> "Monday";
case "3" -> "Tuesday";
case "4" -> "Wednesday";
case "5" -> "Thursday";
case "6" -> "Friday";
case "7" -> "Saturday";
default -> "Invalid Choice";
System.out.println(result);
```

```
String result = switch (args[0]) {
case "1" -> "Sunday";
case "2" -> "Monday";
case "3" -> "Tuesday";
case "4" -> "Wednesday";
case "5" -> "Thursday";
case "6" -> "Friday";
case "7" -> "Saturday";
default -> {
    System.out.println("Invalid selection, valid choices 1-7");
    yield "Invalid Choice";
};
```

```
enum DaysOfWeek {
    SUNDAY, MONDAY, TUESDAY, WEDNESDAY, THURSDAY, FRIDAY, SATURDAY;
public static void main(String[] args) {
    DaysOfWeek dayOfWeek = DaysOfWeek.SUNDAY;
    String result = switch (dayOfWeek) {
    case SUNDAY -> "Sunday";
    case MONDAY -> "Monday";
    case TUESDAY -> "Tuesday";
    case WEDNESDAY -> "Wednesday";
    case THURSDAY -> "Thursday";
    case FRIDAY -> "Friday";
    case SATURDAY -> "Saturday";
   };
    System.out.println(result);
```

Added in Java 16 JEP 394

```
Object actuallyAString = "I'm actually a string!";
if(actuallyAString instanceof String) {//Test if actuallyAString is a String
   String nowImAString = //Assign actuallyAString to a variable
   (String) actuallyAString; //Convert actuallyAString to a String
   System.out.println(nowImAString);
}
```

```
Object actuallyAString = "I'm actually a string!";
if(actuallyAString instanceof String nowImAString) {
    System.out.println(nowImAString);
```

```
Object actuallyAString = "I'm actually a string!";
if(actuallyAString instanceof String nowImAString) {
    System.out.println(nowImAString);
System.out.println(nowImAString); //Compiler error, nowImAString not in scope
boolean isAString = (actuallyAString instanceof String nowImAString);
System.out.println(nowImAString); //Compiler error, nowImAString not in scope
```

```
Object actuallyAString = "I'm actually a string!";
if(actuallyAString instanceof String nowImAString
   && nowImAString.endsWith("!")) {
   System.out.println(nowImAString);
}
```

```
Object actuallyAString = "I'm actually a string!";
if (!(actuallyAString instanceof String nowImAString)) {
//...
} else {
    System.out.println(nowImAString);
if (!(actuallyAString instanceof String nowImAString)) {
    throw new IllegalArgumentException("Must be a string!");
System.out.println(nowImAString);
```

```
Object actuallyAString = "I'm actually a string!";
String aString = null;

if(actuallyAString instanceof String nowImAString) {
    aString = nowImAString;
}

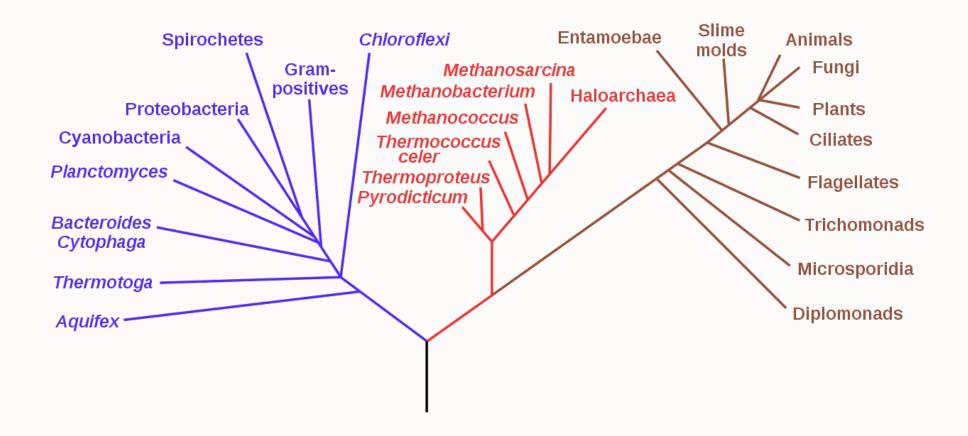

System.out.println(aString);
```

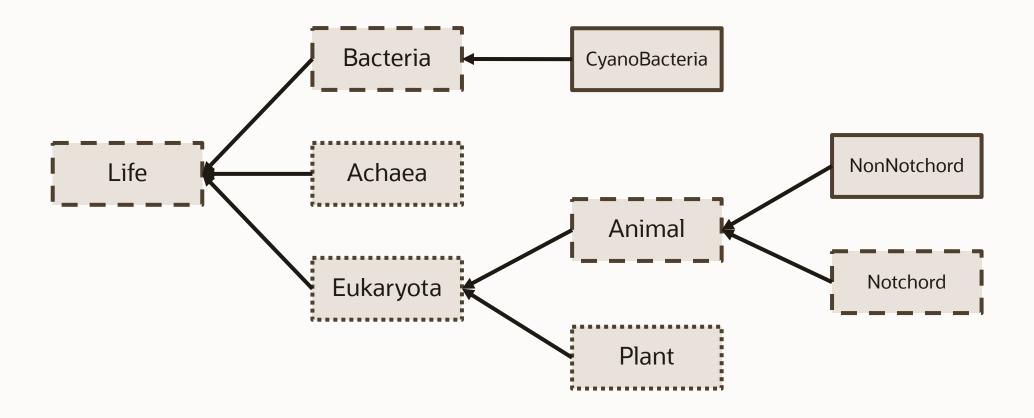

Added in Java 17 JEP 409

Bacteria Archaea Eukaryota

```
public void switchOnLife(Life life) {
    switch (life) {
        case Archaea a -> System.out.println("Is Archaea");
        case Bacteria b -> System.out.println("Is Bacteria");
        case Eukaryota e -> System.out.println("Is Eukaryota");
    }
}
```

Added in Java 16 JEP 395

```
String firstName1 = "Billy";
String lastName1 = "Korando";
String title1 = "Java Developer Advocate";
String twitterHandle1 = "@BillyKorando";
String firstName2 = "Sharat";
String lastName2 = "Chander";
String title2 = "Java Developer Advocate";
String twitterHandle2 = "@Sharat_Chander";

           if (other.twitterHandle != null)
               return false;
       } else if (!twitterHandle.equals(other.twitterHandle))
          return false;
       return true;
   @Override
   public String toString() {
       return "Person [firstName=" + firstName + ", lastName=" + lastName + ", title=" + title
              + ", twitterHandle=" + twitterHandle + "]";
var persons = Stream.of(new Person(firstName1, lastName1, title1, twitterHandle1),
new Person(firstName2, lastName2, title2, twitterHandle2));
persons.forEach(System.out::println);
```

```
String firstName1 = "Billy";
String lastName1 = "Korando";
String title1 = "Java Developer Advocate";
String twitterHandle1 = "@BillyKorando";
String firstName2 = "Sharat";
String lastName2 = "Chander";
String title2 = "Java Developer Advocate";
String twitterHandle2 = "@Sharat_Chander";
record Person(String firstName, String lastName, String title, String twitterHandle) {}
var persons = Stream.of(new Person(firstName1, lastName1, title1, twitterHandle1),
        new Person(firstName2, lastName2, title2, twitterHandle2));
persons.forEach(System.out::println);
```

- Transparent modeling of data as data
- Superclass always java.lang.Record
- Cannot be extend, abstract, and implicitly final
- All fields are final (shallowly immutable)
- Cannot declare instance fields
- Accessors, hashcode, toString, equals, automatically generated
- Can override default implementation, or add your own method definitions

```
String firstName1 = "Billy";
String lastName1 = "Korando";
String title1 = "Java Developer Advocate";
String twitterHandle1 = "@BillyKorando";
String firstName2 = "Sharat";
String lastName2 = "Chander";
String title2 = "Java Developer Advocate";
String twitterHandle2 = "@Sharat_Chander";
record Person(String firstName, String lastName, String title, String twitterHandle) {
    public String toString() {
        return lastName + ", " + firstName +
        " twitter handle: " + twitterHandle +
        " job title: " + title;
var persons = Stream.of(new Person(firstName1, lastName1, title1, twitterHandle1),
        new Person(firstName2, lastName2, title2, twitterHandle2));
persons.forEach(System.out::println);
```

```
record Person(String firstName, String lastName, String title, String twitterHandle) {
    public String toJSON() {
        return """
                    "firstName" : "%s",
                    "lastName" : "%s".
                    "title" : "%s".
                    "twitterHandle" : "%s"
               """.formatted(firstName, lastName, title, twitterHandle);
var persons = Stream.of(new Person(firstName1, lastName1, title1, twitterHandle1),
        new Person(firstName2, lastName2, title2, twitterHandle2));
persons.forEach(p -> System.out.println(p.toJSON()));
```

New Runtime Features and Improvements

CDS Updates

JDK 12

Default CDS Archive: JEP 341

JDK 13

Dynamic CDS Archive: JEP 350

AppCDS

java -XX:ArchiveClassesAtExit=dynamic-archive.jsa -jar <application>

java -XX:SharedArchiveFile=dynamic-archive.jsa -jar <application>

ZGC

JDK 15 (JEP 377)

- From scratch re-design of GC on Java
- Single generation
- Low Latency (<10ms pause times)
- Scalable (multi-terabyte heaps)
- Get started: -XX:+UseZGC -Xmx<size> -Xlog:gc

Helpful NullPointerExceptions

JDK 14

JEP 358

Helpful NullPointerExceptions

```
Exception in thread "main" java.lang.NullPointerException
  at NPEService.main(NPEService.java:7)
```

```
Exception in thread "main" java.lang.NullPointerException:
Cannot invoke "String.length()" because "<local1>" is null
at NPEService.main(NPEService.java:7)
```

AArch64 Support

AArch64 (Arm Arch 64 support)

- Linux JDK 9 (JEP 237)
- Windows JDK 16 (JEP 388)
- macOS JDK 17 (JEP 391)

General Performance Improvements

Spring Boot Petclinic 2.4.5

Requests: 500 (serial)

Heap size: 48 MB

Garbage collector: G1

Java 8 Results (1.8.0_291-b10)

Application startup: 8.665 seconds

Load test execution time: 137 seconds

Java 16 Results (16.0.1+9-24)

Application startup: 6.452 seconds

Load test execution time: 130 seconds

Deprecations Removals And other changes to know about

Deprecations

Security Manager

JDK 17

JEP 411

Applet API

JDK 17

JEP 398

Removals

Nashorn (JavaScript Engine)

JDK 15

JEP 372

CMS Garbage Collector

JDK 14

JEP 363

Other Changes

Strongly Encapsulate JDK Internals JDK 17 JEP 403

No longer relax strong encapsulation with single argument (i.e. --illegal-access=permit)

Some critical internal APIs remain available:

- sun.misc.{Signal,SignalHandler}
- sun.misc.Unsafe (The functionality of many of the methods in this class is available via variable handles (JEP 193).)
- sun.reflect.Reflection::getCallerClass(int) (The functionality of this method is available in the stack-walking API defined by JEP 259.)
- sun.reflect.ReflectionFactory
- com.sun.nio.file.{ExtendedCopyOption,ExtendedOpenOption, ExtendedWatchEventModifier,SensitivityWatchEventModifier}

Strong Encapsulation (cont.)

Eventually --illegal-access=permit will be removed

Can still declare --add-opens to command line and Add-Opens to JAR-Manifest

The Future

Java 17
JEP 406
Pattern Matching for switch (Preview)

```
switch (s) {
    case Triangle t && (t.calculateArea() > 100) ->
        System.out.println("Large triangle");
    case Triangle t ->
        System.out.println("Small triangle");
    default ->
        System.out.println("Non-triangle");
}
```

Java 18

JEP 405

Record Patterns & Array Patterns (Preview)

Array Patterns:

```
Old:
    if (o instanceof String[] sa && sa.length >= 2) {
        String s1 = sa[0];
        String s2 = sa[1];
        System.out.println(s1 + s2);
    }

New:
    if (o instanceof String[] { String s1, String s2, ... }){
        System.out.println(s1 + s2);
}
```

```
Records Patterns:
```

Defined record:

```
record MultiColoredPoint(int i, int j, Color... cols) {}
```

Current way to assign values:

```
MultiColoredPoint(var a, var b, Color[] { var firstColor, var secondColor, ... })
```

Assigning values with Record Patterns:

```
MultiColoredPoint(var a, var b, var firstColor, var secondColor, ...)
```

- Pattern Matching for Sealed classes
- Deconstruction Patterns
